

1–What is your name?

My name is (your first name + last name)

2–What is your profession?

My profession is medicine

3–Why are you taking the OET?

Honestly I'm taking the OET to complete Australian medical council registration process because it is one of the two tests required to practice medicine in Australia. Practicing medicine in Australia is one of my dreams to upgrade myself in my career. In Australia i can get advanced training and recent modalities of diagnosis and treatment. I am also searching for a better chance of education for my children who are an essential part of my life so I hope to pass the OET as soon as possible to start practicing medicine in Australia.

4–How long have you been working as a physician?

I've been working as a physician for 10 years. 5 years were in Egypt and the other 5 years were in United Arab Emirates.

5–What about your working hours?

I'm working for 8 hours daily from Saturday to Thursday so I'm working a bout 48 hours per week. Unfortunately, I've no enough time to spend with my family.

6–Why did you choose medicine as a career?

Actually, it was my childhood dream and it was Also a dream of my family especially my mother so I studied hard to a achieve my target. My first day in the faculty of medicine was one of the happiest days in my life. I like medicine a lot because it gives me the chance to help the others.

7–What about your specialty? And why?

I like all branches of medicine so I was hesitated to choose a specific specialty and Leave the others. Finally I found my target in family medicine because it allows me to practice all branches of medicine and to deal with a variety of cases which in turn help me to feel satisfied.

8–What is your advice for fresh graduates?

Ooh! the most important advice I give to them is to choose their specialty carefully by choosing what they actually like because they will spend the rest of their life practicing it. I also advise them to outline their target at an early stage to avoid wasting their time so I recommend them to find out the different styles of post graduation qualifications before choosing a specific one and to keep updated with the recent guidelines to help people well.

9–How to be a successful physician?

Ooh! What a difficult question! from my point of view I think that success in the field of medicine mainly depends on early and proper planning for your career pathway. You should fulfill two elements. The first element is the good planning which will save time and effort for you and the second one is hard continuous working. You should also have a lot of skills like being a good listener, showing sympathy to your patients, respecting the patients' time and confidentiality, building a trust bond between you and the patients and continuously updating yourself with the new guidelines

10–What was the last training you had?

I'm keen to get frequent training courses. The last one that I had was about **"advanced cardiac life support"** which was about one month ago and implied how to perform a cardiac and respiratory support in case of cardiac arrest. It also taught us how to deal with the cases of life threatening arrhythmias. It was really a valuable course.

11–What is the most recent medical advance you heard about?

No doubt that the medical field is one of the fastest developing fields in the world. Nearly every month there are new researches, theories and guidelines. Diabetes mellitus treatment is one of the most important tasks that is developing rapidly. I heard about a new trend of the treatment of diabetic patients by putting a pump of insulin under their skin to release proper amounts of insulin according to their need which will help them to get rid of the needles pricks and gain a good control of their blood glucose level all over the day.
