Read the case notes and complete the writing task which follows.

Notes

PATIENT DETAILS:

Name: Ms. Sarah Miller

Age: 22/04/1998 - 25 years old

Patient history: **Occupation:** Primary school teacher

Social: Non-smoker, drinks 1-2 units of alcohol/week

Hobbies: Swimming, outdoor hiking

Family history: Mother: Adult acne

Father: Hypertension

Medical history: Childhood eczema (resolved)

Seasonal allergies (hay fever)

15/09/2023:

Subjective: C/O persistent facial breakouts, mainly cheeks and forehead.

Duration: 6 months. Used various OTC facial scrubs/washes with no success.

Reports skin feels 'tight' and occasionally itchy.

Objective: Inflammatory papules and closed comedones on bilateral cheeks.

Mild erythema. Temp: 36.8 - Pulse: 72 - BP: 115/75.

Management: Topical Benzoyl peroxide 5% gel. Advice on gentle cleansing. Review in 4 weeks.

13/10/2023:

Subjective: Acne persists; reports 'burning' sensation after applying topical gel. No significant improvement in skin clarity. Feeling self-conscious at work.

Objective: Increased redness (erythema). Pustules noted on chin and nose. Dry, flaky skin in treated areas.

Management: Discontinue Benzoyl peroxide. Start Topical Clindamycin 1% twice daily. Review in 6 weeks.

20/11/2023:

Subjective: Minimal improvement in acne. Reports frequent facial flushing, especially after hot drinks or exercise.

Objective: Moderate cystic acne. Persistent background redness on cheeks and nose. Fine telangiectasia noted on nasal alae.

Diagnosis: Refractory acne vulgaris.

Management: Commenced oral Lymecycline 408mg daily. Advised sun protection.

01/01/2024:

Subjective: Patient distressed; acne 'worse than ever'. Persistent stinging and flushing. Desperate for specialist intervention.

Objective: Severe cystic acne with scarring. Marked facial erythema and papulopustular lesions. Suspected Rosacea overlap.

Plan: Refer to dermatologist for management of severe acne and investigation of rosacea.

Writing Task:

Refer the patient to a dermatologist for assessment and specialist management of severe acne and possible rosacea. Write the letter to Dr. Helena Vance, Dermatologist, Skin Health Clinic, 45 Central Avenue, Newtown.

In your answer:

- Expand the relevant notes into complete sentences
- Do not use note form
- Use letter format
- The body of the letter should be approximately 180-200 words.
